Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1 sets forth the engine by inferential inclusion. Is the intake device to be claimed alone or in combination with an engine?

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3-6, and 8-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Lockwood et al (5025889).

Lockwood et al show a primary inlet duct 30, an secondary inlet duct 36, and a reflector wall near 42.

Claims 1, 3-6, and 8-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Wilson (2403699).

Figure 1 shows a primary duct 70 and a secondary 81.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3747

Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Wilson. The intake device of Wilson appears to be an unspecified metal. It would have been obvious to one of ordinary skill in the art to make the device of Wilson from aluminum to save weight and be corrosion resistant.

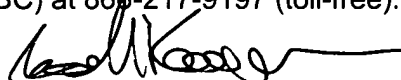

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Wilson as applied to claim 1 above, and further in view of Gillingham et al.

Gillingham et al show an air filter 204 connected to the inlet of the resonator 202; therefore, it would have been obvious to one of ordinary skill in the art to place an air filter upstream of the resonator of Wilson to provide clean air to an engine.
